

SEADRILL3700HFRIG

SEADRILL3700HFRIG is a high frequency motor suitable for water column drilling in reinforced concrete, masonry and natural stone.

Being managed by a high frequency converter, it runs with 3700W output in single-phase and 6500W in three-phase, depending on the electrical availability of the site.

Much appreciated for its high speed, it is suitable for drilling $\varnothing 20 - \varnothing 150$ mm and is the ideal solution for machining in small spaces.

TECHNICAL SPECIFICATIONS

	UoM	SINGLE PHASE	THREE-PHASE
Voltage	V	230	400
Max Power	W	3700	6500
Continuous power	W	2700	4800
Total Length	mm	375	375
Weight	Kg	6,2	6,2

Fitted with 3 mechanically selectable motor speeds:

- 1 – 630 rpm
- 2 – 1400 rpm
- 3 – 2900 rpm

CODE	DESCRIPTION
SEADRILL3700HFRIG	High frequency motor for water drilling on column – 1"1/4
SEASTAND250	Tilting column 250 for diamond core drilling machine
PSTAND250	Steel column depth 250 tiltable for diamond core drilling machine
SEACUT400HF6D	Frequency converter
